

Storage Box Jacket Setup

1. Print the jacket out (ideally on cardstock).
 - Print "actual size" (100%).
 - To include the jacket inside (if any) print double-sided flipping on the "long edge".
2. Use the crop marks and origami symbols to cut and fold the jacket.
 - Exact procedure depends on your tools and preferred methods.
 - Example procedure #1:
 1. Use the origami mountain fold lines to score the fold lines (e.g. using a ruler and a penknife).
 2. Use the crop marks to cut the edges off.
 3. Make two mountain folds using the scored lines along the spine.
 - Example procedure #2:
 1. Use the crop marks to cut away the left and right edge.
 2. Make a *valley* fold by touching the origami dots symbols along the top edge together and then flatten the paper to make the fold and then unfold flat. Repeat this procedure with the origami dot symbols along the bottom edge.
 3. Cut away the top and bottom edges (you may use the ends of the origami mountain fold lines as well as the edges of the jacket as guide to where to make these cuts).
 4. Make two *mountain* folds by reversing the (valley) creases.
3. Insert the jacket into the storage box.
